

oracle exp, imp 实现远程导数据

1. 将远程数据导出到本机
2. 将本机dmp文件导入到另外一个远程数据库

eg:

```
exp cenbuf/cenbuf@172.16.91.20:1521/dws file=D:\pmz_b.dmp tables=
```

```
(cen_core_v21b.tb_yl_patient_information_test,cen_core_v21b.TB_YL_MZ_MEDICAL_RECORD_test,cen_core_v21b.TB_YL_ZY_MEDICAL_RECORD_test)
```

```
imp cenbuf/cenbuf@172.16.92.1:1521/dws file=D:\pmz_b.dmp full=yljgdm
```
