

Oracle 11g Concepts 阅读笔记

show parameters : to see the current settings for initialization parameters

spool : to write the output to a file （把一句或多句SQL语句输出保存为操作系统文件）

eg :

```
spool emp_salary.lst
```

```
select first_name, last_name, salary from employees;
```

```
spool off
```

```
!
```

11 : 列出刚才保存的文件

p194

Concepts 35
