

## ogg复制失败解决方法

抽取报错：

```
2014-04-29 10:25:03 INFO   OGG-00993 Oracle GoldenGate Capture for MySQL, ext_te2.prm: EXTRACT EXT_TE2 started.
2014-04-29 10:25:03 ERROR  OGG-01496 Oracle GoldenGate Capture for MySQL, ext_te2.prm: Failed to open target trail file /home/mys
ql/ggs/dirdat/e2000001, at RBA 1011.
2014-04-29 10:25:03 ERROR  OGG-01668 Oracle GoldenGate Capture for MySQL, ext_te2.prm: PROCESS ABENDING.
```

复制报错：

```
2014-04-29 10:27:34 ERROR  OGG-00446 Oracle GoldenGate Delivery for Oracle, rep_t2.prm: No data selecting position from checkpoin
t table test2.chkptab for group 'REP_T2', key 3018732020 (0xb3ee31f4), SQL <SELECT a.current_dir, a.seqno, a.rba, a.audit_ts, a.log_c
mplt_csn, a.log_cmpl_tids, b.log_cmpl_tids FROM test2.chkptab a LEFT JOIN test2.chkptab_lox b ON a.group_name = b.group_name AND a.
group_key = b.group_key AND a.log_cmpl_csn = b.log_cmpl_csn WHERE a.group_name = 'REP_T2' AND a.group_key = 3018732020>.
2014-04-29 10:27:34 ERROR  OGG-01668 Oracle GoldenGate Delivery for Oracle, rep_t2.prm: PROCESS ABENDING.
```

解决：

复制端：

```
SQL> connect test2/test2
Connected.
SQL> select * from tab;
```

TNAME	TABTYPE	CLUSTERID
CHKPTAB	TABLE	
CHKPTAB_LOX	TABLE	
TEST2	TABLE	

```
SQL> drop table chkptab;
```

Table dropped.

```
SQL> drop table chkptab_lox;
```

Table dropped.

删除源与目标端的 **dirchk** 目录下的文件，此时两端**info all**

只有**MGR**

重新添加抽取，传递，复制，参数不变，只是绑定关系

重新启动各进程，成功。
