

## ora 00031

```
SQL> alter system kill session '158,7325';  
alter system kill session '158,7325'  
ORA-00031: 标记要终止的会话
```

```
SQL>
```

```
[oracle@rac01 ~]$ oerr ora 31  
00031, 00000, "session marked for kill"  
// *Cause: The session specified in an ALTER SYSTEM KILL SESSION command  
//          cannot be killed immediately (because it is rolling back or blocked  
//          on a network operation), but it has been marked for kill. This  
//          means it will be killed as soon as possible after its current  
//          uninterruptable operation is done.  
// *Action: No action is required for the session to be killed, but further  
//          executions of the ALTER SYSTEM KILL SESSION command on this session  
//          may cause the session to be killed sooner.  
[oracle@rac01 ~]$
