

set a file so that it can be deleted only by their owners or the superuser(root)

参考: <https://dev.mysql.com/doc/refman/5.7/en/problems-with-mysql-sock.html>

On most versions of Unix, you can protect your `/tmp` directory so that files can be deleted only by their owners or the superuser (`root`). To do this, set the sticky bit on the `/tmp` directory by logging in as `root` and using the following command:

```
shell> chmod +t /tmp
```

You can check whether the sticky bit is set by executing `ls -ld /tmp`. If the last permission character is `t`, the bit is set.
