

## 查看表空间高水位线

```
SELECT tablespace_name,
       file_name,
       file_size,
       hwm,
       file_size - hwm can_save
FROM ( SELECT /*+ RULE */
        ddf.tablespace_name,
        ddf.file_name file_name,
        ddf.bytes / 1048576 file_size,
        (ebf.maximum + de.blocks - 1) * dbs.db_block_size / 1048576
        hwm
      FROM dba_data_files ddf,
           ( SELECT file_id, MAX (block_id) maximum
             FROM dba_extents
            GROUP BY file_id) ebf,
           dba_extents de,
           (SELECT VALUE db_block_size
            FROM v$parameter
            WHERE name = 'db_block_size') dbs
      WHERE ddf.file_id = ebf.file_id
            AND de.file_id = ebf.file_id
            AND de.block_id = ebf.maximum
      ORDER BY 1, 2);
```

降低表空间的高水位线：

试了各种方法，最后发现都没用

唯有一招，先将表空间里的对象移走到别的表空间，然后resize，再把对象移回来。
