

数据库字符集不符导致Impdp报错

参考：<http://blog.csdn.net/lyb3290/article/details/53758884>
<http://blog.itpub.net/12679300/viewspace-1326209/>
<https://www.cnblogs.com/hellojesson/p/7047552.html>
<http://blog.chinaunix.net/uid-27570589-id-3431166.html>

解决方法：

更改测试库的字符集和生产库一样

```
shutdown IMMEDIATE;  
startup mount  
alter system enable restricted session;  
alter system set aq_tm_processes=0;  
alter database open;  
alter database character set internal_use ZHS16GBK;  
shutdown immediate  
startup
```
