

SQL analyze table CEN_CORE_V21B.TB_TJ_ZJBG compute statistics;

ORA 38029 对象统计信息已锁定

参考：<http://blog.itpub.net/29867/viewspace-730902/>

```
SQL> analyze table CEN_CORE_V21B.TB_TJ_ZJBG compute statistics;
analyze table CEN_CORE_V21B.TB_TJ_ZJBG compute statistics;
analyze table CEN_CORE_V21B.TB_TJ_ZJBG compute statistics
ORA-38029: 对象统计信息已锁定
```

SQL>

解锁:

1. 表级

```
DBMS_STATS.UNLOCK_schema_STATS('username');
```

2. 用户级

1) 先查出被锁定的表 `select table_name from user_tab_statistics where stattype_locked is not null;`

然后再解锁对象

```
exec dbms_stats.unlock_table_stats(user, '表名');
```

2) 也可直接生成sql脚本

```
select 'exec dbms_stats.unlock_table_stats('' || user || ''', '' || table_name || '');' from user_tab_statistics where stattype_locked
is not null;
```
