

impdp 报错：ORA-01628 ORA-39171

参考：<http://blog.csdn.net/li19236/article/details/77414758>

<http://blog.itpub.net/24996904/viewspace-774533/>

<http://www.aiuxian.com/article/p-1660678.html>

```
ORA-39171: Job is experiencing a resumable wait.
ORA-01628: max # extents (32765) reached for rollback segment _SYSSMU59_3967623742$
ORA-39171: Job is experiencing a resumable wait.
ORA-01628: max # extents (32765) reached for rollback segment _SYSSMU59_3967623742$
ORA-39171: Job is experiencing a resumable wait.
ORA-01628: max # extents (32765) reached for rollback segment _SYSSMU59_3967623742$
```

解决方法：

1. 给UNDO表空间增加数据文件

eg：

```
SQL> alter tablespace UNDOTBS1 add datafile size 100M autoextend on next 1M maxsize 32767M;
Tablespace altered.
SQL>
```

note：db_block_size为8K时，数据文件要小于（而不是小于等于）32G，所以我指定数据文件为32G时报错

```
SQL> alter tablespace UNDOTBS1 add datafile size 100M autoextend on next 1M maxsize 32767MB;
alter tablespace UNDOTBS1 add datafile size 100M autoextend on next 1M maxsize 32767MB
*
```

ERROR at line 1:

```
ORA-02494: invalid or missing maximum file size in MAXSIZE clause
SQL>
```

参考：<http://blog.csdn.net/scofy0/article/details/50210123>

2. 重建（更大的）UNDO表空间，创建一个新的UNDO表空间替换原来的UNDO表空间。

3.

<http://blog.csdn.net/kaertiger/article/details/6323928>

1) 查看当前是什么在使用回滚段：

```
SELECT      r.NAME, s.sid, s.serial# Serial,
s.username , s.machine ,
t.start_time, t.status ,
t.used_ublk ,
substr(s.program, 1, 15)    "operate"
FROM        v$session      s, v$transaction  t, v$rollname  r, v$rollstat  g
WHERE       t.addr = s.taddr
AND        t.xidusn = r.usn
AND        r.usn = g.usn
ORDER      BY            t.used_ublk desc;
```

2) 根据sid查出具体的SQL：

```
select sql_text from v$session a, v$sqltext_with_newlines b where DECODE(a.sql_hash_value, 0, prev_hash_value,
sql_hash_value)=b.hash_value and a.sid=&sid order by piece;
```
