

ORA-20005 object statistics are locked (stattype = ALL)

参考：<http://blog.csdn.net/mikean/article/details/11541821>

收集统计信息时报错：

```
SQL> exec dbms_stats.gather_table_stats('CEN_CORE_V20', 'TB_LIS_INDICATORS');  
BEGIN dbms_stats.gather_table_stats('CEN_CORE_V20', 'TB_LIS_INDICATORS'); END;
```

*

ERROR at line 1:

ORA-20005: object statistics are locked (stattype = ALL)

ORA-06512: at "SYS.DBMS_STATS", line 24281

ORA-06512: at "SYS.DBMS_STATS", line 24332

ORA-06512: at line 1

SQL>

原因：impdp导入时没加参数statistics=safe（当原数据exp的统计信息和真实的统计信息一致的时候，imp源统计信息；当原数据exp的统计信息和真实的统计信息不一致的时候，重新计算优化器统计信息）

解决方法：解锁表统计信息

```
SQL> exec DBMS_STATS.UNLOCK_TABLE_STATS('CEN_CORE_V20', 'TB_LIS_INDICATORS');
```

PL/SQL procedure successfully completed.
