       DESCRIPTION
         This script defaults the dbid and instance number to that of the
         current instance connected-to, then calls awrddrpi.sql to produce
Rem
         the Workload Repository Compare Periods report.
Rem
Rem
Rem
Rem
         Run as select_catalog privileges.
         This report is based on the Statspack report.
