db2 增删改如何不生成日志

参考：http://www.dbatodba.com/db2/how-to-do/how-to-insert-delete-update-data-without-generate-logs-on-db2/

eg:
ON CLP:

```
db2 +c alter table <table_name> activate not logged initially

db2 +c delete from <table_name> where <column_name>='<value>'

OR

db2 +c insert into table <table_name> (select * from table_name)

OR

db2 +c update table_name set <column_name>='value' where <column_name>='value'

db2 commit
```

ON TOAD EDITOR OR ON THE OTHER EDITOR:

```
db2 alter table <table_name> activate not logged initially

db2 delete from <table_name> where <column_name>='<pattern>'

OR

db2 insert into table <table_name> (select * from table_name)

OR

db2 update table_name set <column_name>='value' where <column_name>='value'

db2 commit
```
