创建Create Table 触发器

```
create or replace trigger trig1_create_table
    after create on userbehavior
declare
    event varchar2(20);
    type varchre2(20);
    name varchar2(30);
    owner varchar2(30);
begin
    event := sysevent;
    type := dictionary_obj_type;
    name := dictionary_obj_name;
    owner := dictionary_obj_owner;
    when (type = table and owner='userbehavior)
    then
    grant select on owner.name to zengcb;
end;
```
